PROFESSIONAL SUMMARY

Full Stack Developer and B.E. Information Technology student with hands-on experience building web and mobile applications using JavaScript, TypeScript, React, Next.js, Node.js, and MongoDB. Experienced in REST APIs, real-time systems, AI/agentic workflows, video applications, and third-party integrations.

EXPERIENCE

Full Stack Developer Intern — TenAI's Consultant May 2026 – Present

- Develop full-stack features across web and React Native applications using Next.js, Node.js, Express.js, TypeScript, and MongoDB.
- Build AI-driven interview workflows using LangChain, LangGraph, and LLM integrations, contributing to conversational agents and interview evaluation.
- Integrate real-time voice interactions across speech-to-text and text-to-speech pipelines.
- Implement REST APIs, WebSocket communication, Redis caching, BullMQ background processing, and third-party integrations.
- Develop vision-based interview analysis using MediaPipe and contribute to testing, debugging, and production quality.

SELECTED PROJECTS

Agstyaa Consultant — Learning Management & Video Platform

Next.js · TypeScript · Node.js · Express · MongoDB · Cloudflare R2 · JWT

- Engineered a full-stack learning platform with role-based authentication, enrollment-gated content, course management, and admin workflows.
- Built secure video delivery using short-lived JWT playback tokens, protected streaming endpoints, and HTTP Range support.
- Integrated Cloudflare R2 presigned uploads for large media transfers, supporting 10 GB+ media assets.
- Deployed with Vercel, Render, MongoDB Atlas, and Cloudflare R2, supporting 100+ concurrent users across web and mobile.

DevEvaluate — Real-Time Collaborative Technical Interview Platform

React 19 · Node.js · Express · MongoDB · Stream · WebSockets · Monaco Editor · Inngest · Clerk

- Built 1-on-1 technical interview rooms with video/audio, screen sharing, recording, real-time chat, and authenticated sessions.
- Integrated Monaco Editor with WebSocket synchronization for real-time code collaboration between interviewer and candidate.
- Implemented isolated code execution with automated test-case evaluation and immediate success/failure feedback.
- Developed REST APIs and asynchronous workflows using Express and Inngest, with TanStack Query for client-side caching.

StreamTweet — Video & Social Platform

React 19 · Vite · Redux Toolkit · Node.js · Express · MongoDB · Groq Whisper · Mistral AI

- Engineered a full-stack video-sharing platform with adaptive HLS streaming from 360p–720p+.
- Integrated Groq Whisper for automated transcription and Mistral AI for AI-powered video question answering.
- Built social features including likes, subscriptions, and tweets with Redux Toolkit.

ValueBid — Real-Time Auction & Bidding Platform

React 19 · Redux Toolkit · Node.js · Express · MongoDB · Cloudinary · Node-cron

- Built a full-stack auction platform with separate user/admin dashboards and real-time bidding workflows.
- Automated approximately 80% of manual auction tasks using scheduled Node-cron workflows.
- Implemented payment verification, image management, filtering, leaderboard functionality, and email workflows.

ACTIVITIES & PARTICIPATION

QR-Based Event Management System — Horizon College Event

- Participated in developing and deploying a QR-based check-in/check-out system used for 500+ students, with automated email communication.
- System was later reused for an internal hackathon with an attendance and event dashboard.

EDUCATION

B.E. — Information Technology 2023 – 2027

Sir Visvesvaraya Institute of Technology, Chincholi | CGPA: 7.7/10

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Java
Frontend:	React.js, Next.js, React Native, Redux Toolkit, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs
Database:	MongoDB, MongoDB Aggregation
AI / Agentic AI:	LangChain, LangGraph, LLM Integration, AI Agents
Real-Time & Media:	WebSockets, Stream SDK, HLS
Cloud:	Cloudflare R2, Redis, BullMQ, Vercel, Render
Tools:	Git, GitHub, Postman
